USER INTERFACE DESIGN

EXPERIMENT 1 – E-COMMERCE UI DESIGN IMPROVEMENT

NAME: Roshni R **REG NO:240701443**

Aim

To analyze the drawbacks of the existing E-commerce UI design and implement improvements to enhance usability, visual hierarchy, and user experience.

OLD UI DESIGN

Features & Drawbacks Identified:

1. Minimal Header Section

- The header contained only a logo, search bar, and cart icon.
- No **Sign In** option was visible.
- The layout looked incomplete and less interactive.

2. Lack of Navigation Categories

- No category section such as *Home Appliances*, *Recommended for You*, or *For Sale*.
- Users could not easily browse different product sections.

3. Weak Promotional Display

- The banner image lacked promotional text.

- No clear call-to-action or offer highlight.
- The section did not attract immediate user attention.

4. Unstructured Product Layout

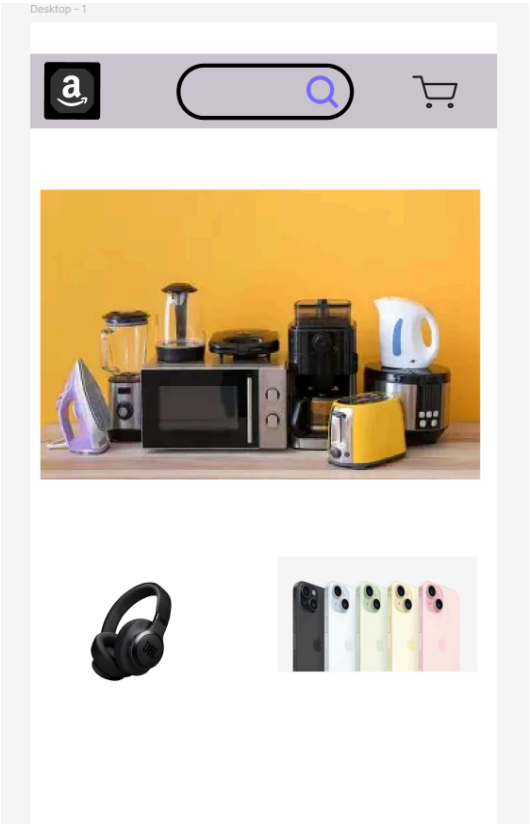
- Products were placed without clear alignment.
- Spacing between product items was inconsistent.
- The layout appeared plain and less engaging.

5. Missing Product Information

- Product prices were not clearly visible.
- No emphasis on featured or recommended products.
- Important details were not highlighted.

6. Poor Visual Hierarchy

- No clear distinction between banner and product section.
- Important elements were not visually prioritized.



MODIFIED UI DESIGN

Features & Enhancements:

1. Improved Header Section

- Added a visible **SIGN IN** option for better accessibility.
- Search bar is centrally aligned and more prominent.
- Cart icon remains clearly visible for quick checkout access.

2. Navigation Menu Added

- Categories such as:
    - Home Appliances
    - Recommended for You
    - For Sale
- Improves browsing and enhances user convenience.

3. Promotional Banner Enhancement

- Large, high-quality image of home appliances added.
- Promotional text included: **“OFF TO COLLEGE DEALS”**
- Creates a strong marketing appeal and attracts attention.

4. Structured Product Layout

- Products displayed in a clean two-column layout.
- Proper spacing and alignment maintained.
- Clean white background improves clarity.

5. Clear Pricing Display

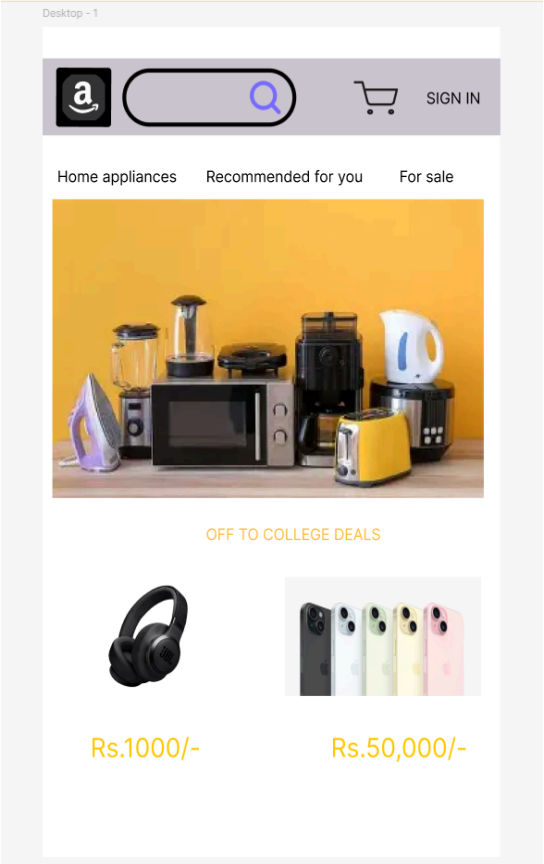
- Headphones priced at: **Rs.1000/-**
- Smartphones priced at: **Rs.50,000/-**
- Prices highlighted prominently for better visibility.

6. Enhanced Visual Hierarchy

- Logical content flow:
  Header → Navigation → Banner → Offer Text → Product Section
- Important elements are larger and visually distinct.

7. Improved User Experience

- Better contrast and readability.
- Organized layout with balanced spacing.
- Professional and modern appearance.



Result

The modified UI design significantly improves visual appeal, usability, and user engagement by introducing better structure, navigation, promotional highlights, and clear product information.
