USER INTERFACE DESIGN

EXPERIMENT 4 – PROTOTYPE WITH FAMILIAR AND UNFAMILIAR NAVIGATION

NAME : Roshni R **REG NO : 240701443**

Aim

To design a web based prototype with familiar and unfamiliar navigation elements and to evaluate the ease of use among different user groups using Proto.io.

PROTOTYPE UI DESIGN

(Home Decor Web Prototype)

Screens used

The prototype contains three screens:

1. Home Screen
2. Decor Ideas Screen
3. My Profile Screen

SCREEN 1 – HOME SCREEN

Features implemented

1. Hero section with overlapping images

● Large tilted and overlapping decor images are used.
● The layout is inspired by modern visual discovery websites.
● Images are used as the main interaction elements.

2. Clear title and visual focus

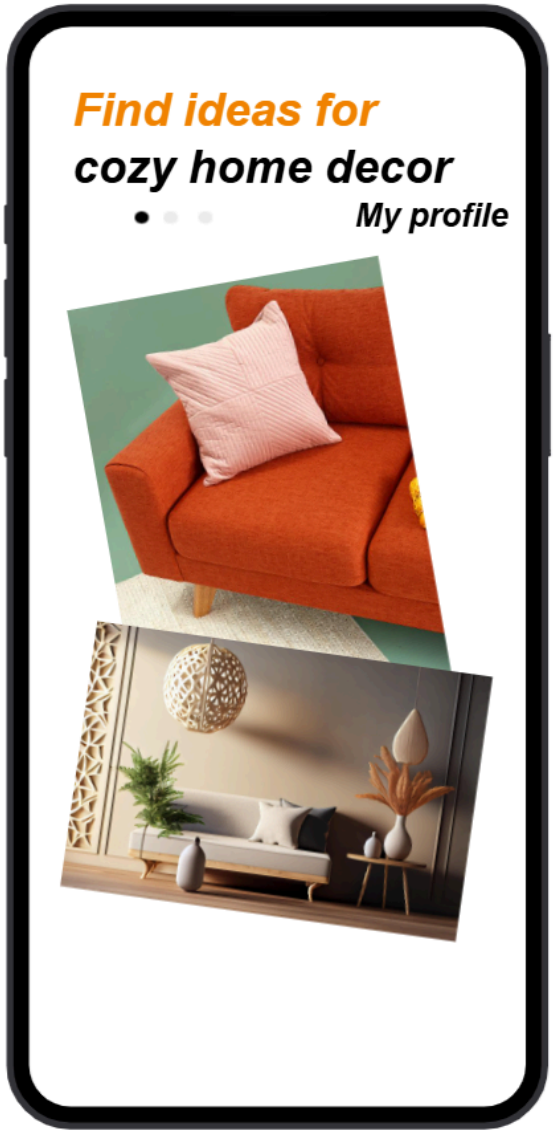
● Heading displayed as “Find ideas for cozy home decor”.
● The heading clearly indicates the purpose of the website.

3. Image based navigation

- Tapping the main image navigates to the Decor Ideas screen.
- Buttons are not used for navigation in this section.

4. Profile access

- “My profile” text is provided for navigating to the profile page.



SCREEN 2 – DECOR IDEAS SCREEN

Features implemented

1. Gallery layout

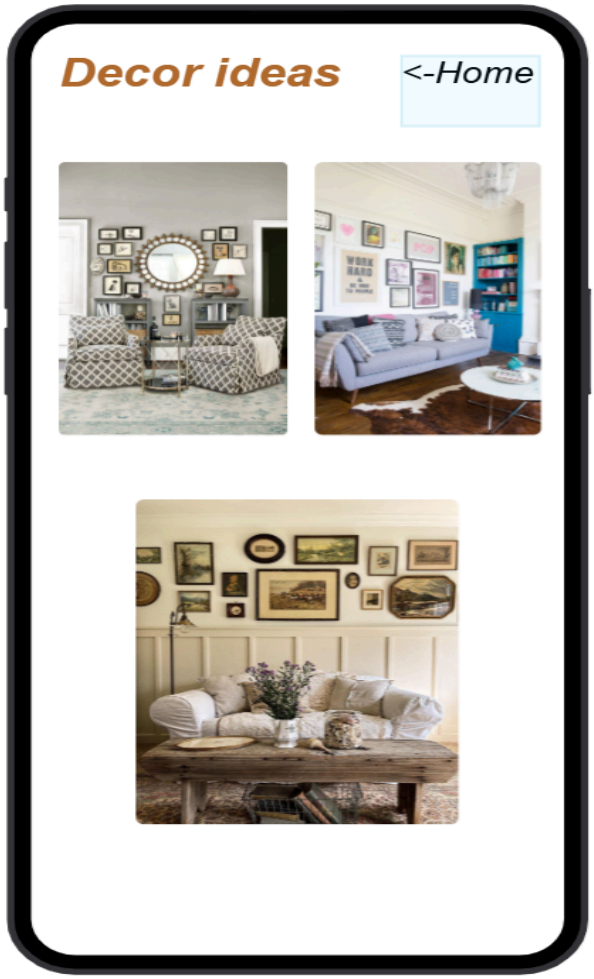
● Multiple decor images are displayed in a clean grid layout.
● The layout allows users to visually explore different home decor ideas.

2. Simple navigation

● “<- Home” option is provided to return to the Home screen.

3. Image interaction

● Images act as interactive elements for browsing and exploration.



SCREEN 3 – MY PROFILE SCREEN

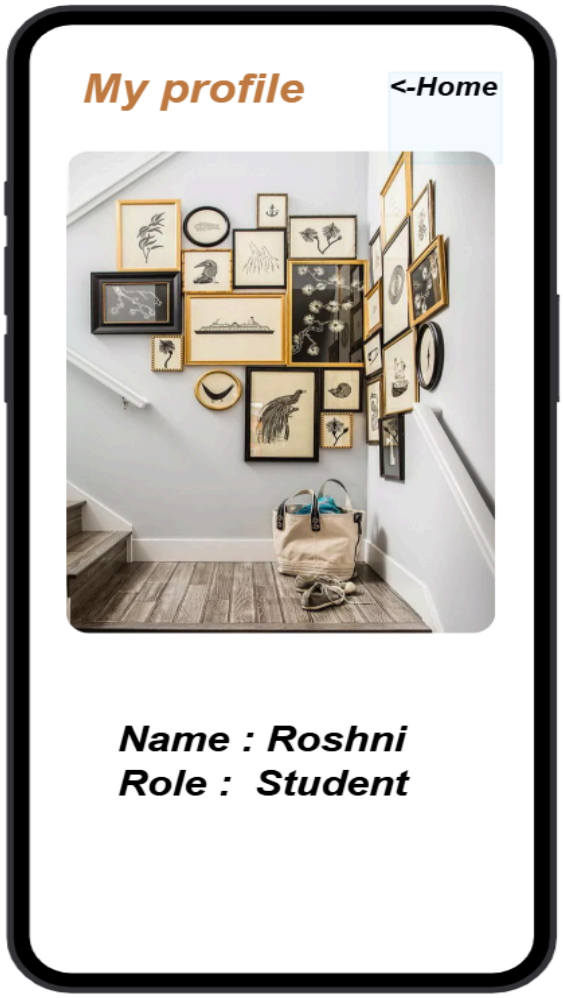
Features implemented

1. Profile information display

● Profile image is displayed clearly.
● User information is shown as:
Name : Roshni
Role : Student

2. Simple back navigation

● “<- Home” option is provided to return to the Home screen.



FAMILIAR NAVIGATION ELEMENTS

- Home and back navigation links
- Clear screen titles
- Simple and readable layout
- Text based navigation for profile and home access

UNFAMILIAR NAVIGATION ELEMENTS

- Images used as navigation instead of traditional buttons
- Tapping visual cards to move between screens
- Overlapping and tilted image cards used as interactive elements

USABILITY EVALUATION

User groups

1. Group A – 18 to 22 years (High technical knowledge)
2. Group B – 30 to 40 years (Moderate technical knowledge)
3. Group C – 45 years and above (Low technical knowledge)

Tasks given to users

- Open the Home screen
- Navigate to the Decor Ideas screen using images
- Return to the Home screen
- Open the My Profile screen
- Return back to the Home screen

Feedback observed

- Younger users easily understood the image based navigation.
- Middle aged users were able to use both text and image navigation comfortably.
- Older users preferred visible text navigation such as the Home link.

Result

The web prototype with three screens (Home, Decor Ideas and My Profile) was successfully created.
The combination of familiar and unfamiliar navigation elements improved visual appeal and user engagement while maintaining ease of use for different user groups.
